

EE/CprE/SE 4920 STATUS REPORT 5

3/12/26 - 3/26/26

Group Number: sdmay26-40

Project Title: True Force Technologies Arcade Rack

Client: True Force Technologies

Advisor: Matt Post

Team Members/Role:

Jacob Garcia - Frontend Development

Dylan Longlett - Frontend Development, Electronics

Andy Drafahl - Team Manager, Frontend Development

Fadi Masannat - Frontend Development

Sofi Gutierrez - Frontend Development

Parnika Dasgupta - Client Liaison, Frontend Development

Colin Yuska - Electronics

Weekly Summary

This past few weeks, the team has worked on fixing the arcade cabinet, eliminating bugs from the minigames and polishing them, adding more music, and creating a utility for easy testing even when the team doesn't have access to the force rack. They also got the cash receptor working so that playing a minigame requires inputting a dollar first.

Past Week Accomplishments

Jacob Garcia

- Work on fixing the cabinet
- Bug fixes on the Rocket Launch game

Parnika Dasgupta

- Worked more on Pop the Balloon
- Added new avatars to the game
- Added better effects to the game

Dylan Longlett

Worked on fixing the cabinet.

Fadi Masannat

I created the base main game, Dylan was working on a separate one so I called mine Main Game V2. I polished it, enhanced it with effects and animations and our client liked it. I also made a utility script and functionality to demo the game locally from the laptop as opposed to having to boot up the arcade rack every time, which should make future testing and polish much faster.

Sofi Gutierrez

I created more graphics and added power ups, more obstacles, and sounds to the game. I also tested it on the cabinet and edited GameSelector so UFO Escape shows up. I also worked on the design document and slideshows

Colin Yuska

I helped implement the cash receptor, and worked to make plans for a custom front plate to fit the cash receptor and receipt printer when that arrives.

Andy Drafahl

- Finished music for the space game.
- Created idle music for the power puller game.
- Created a mockup of the team's poster.

Individual Contributions

Name	Individual Contributions	Hours This Week	Hours Cumulative
Jacob Garcia	- Work on fixing the cabinet - Bug fixes on the Rocket Launch game	5	36
Parnika Dasgupta	- Worked on Pop the balloon - Added Avatars to the game	3	14
Dylan Longlett	- Work on fixing the cabinet	3	40.67
Sofi Gutierrez	- Finished the UFO Escape game	15	26
Colin Yuska	- Helped set up cash receptor - Worked on custom front panel for cabinet	4.13	15.38
Fadi Masannat	- Made the polished main screen game - Made a Utility to demo game modes locally as opposed to dependency on the arcade	8	22
Andy Drafahl	- Finished space game music. - Made idle music for power puller game. - Made mockup for team poster.	10.47	22.48

Plans for the Upcoming Week

Jacob Garcia

- Continue polishing the Rocket Launch mini game.

Parnika Dasgupta

- Work on loading the game on the Arcade
- Wrap up the game completely since it has been a while

Dylan Longlett

Fadi Masannat

Expand the utility local demo script to a full on shared utility that is compatible with ALL game modes, for everyone's use. I also want to implement the client's requests on certain UI changes and further polish. If I have more time I want to start making tests.

Sofi Gutierrez

I want to adjust some of the aesthetics to make it more exciting, especially the intro screen. I need to figure out screen sizing to ensure it goes full screen. And maybe start making software tests.

Colin Yuska

- When receipt printer arrives, implement it.
- Communicate with client to design front plate for cabinet.

Andy Drafahl

- Finish music for power puller game
- Make music for water balloon game
- Add sound effects to the countdown game

Summary of Weekly Advisor Meeting

Our advisor had some instructions for a minor adjustment we needed to make to the arduino, but otherwise told us to keep our current pace. Our client is excited about how far we've gotten and wants us to keep up the good work. He plans on making some final adjustments to the cabinet, but we seem to be fulfilling all of the requirements he was hoping for.
